PROFILE

Developer with five years of experience, specialized in full-stack development. For more than three years, I have worked on both Frontend and Backend development, using Angular and React for the interface, and Spring, Django and NodeJs for the server-side.

I have designed and optimized RESTful APIs for consumer and business products, acquiring solid expertise in SQL databases, version control systems like Git, and technologies for storage, caching, and data processing.

Additionally, I have advanced development skills in SQL, JS, TS, Java, Python, and Java. Currently, I am expanding my knowledge in cloud platforms such as AWS and Azure.

LANGUAGES

- Español: Native
- English: Fluent

PROGRAMIN LANGUAGES

- JavaScript
- TypeScript
- Java
- Phytion

ESTRUCTURE & STYLE

- HTML
- CSS
- SASS
- Tailwind
- Bootstrap

DATA BASE

- MySQL
- Postgres
- SQL Server

EXPERIENCE WITH

- Angular
- React
- Springboot
- NodeJs
- Django
- GitHub
- RESTful API

SKILLS

- ✓ Effective Communication
- ✓ Problem Solving
- ✓ Quality Management
- ✓ Project Management
- ✓ Proactivity
- ✓ Team Work
- ✓ Adaptability
- ✓ Time Management

Full Stack Developer Emiliano Quintero Beltrán

Resume

EDUCATIONAL BACKGROUND

- **Mechatronics Engineer:** Universidad Tecmilenio (Guadalajara, Jal).
- **High School:** Tecmilenio (Culiacán, Sin).

PROFESSIONAL EXPERIENCE

Full-Stack Developer React / Django & NodeJs: Local business solutions. (2024 – 2025)

- **Interface and Service integration for inventory management.**
 - **Front-End:** React interface with routing and hooks for inventory management with RESTful API integration, supporting inventory management functionalities like GET, POST, UPDATE, and DELETE methods.
 - **Back-End:** Implemented APIs for inventory management application in Django and NodeJs for two different clients. Implemented and maintained connections to PostgreSQL databases for efficient data management and integration.

Jr Full-Stack Developer Angular / Spring & NodeJs: Coppel (2022 – 2024)

- **Employee management and off boarding Interface and service.**
 - **Front-End:** Angular interface systems for employee management like recording employee off boarding with RESTful API integration and Routing between components. With user validation and access control, as well as management of web statuses such as errors and accurate data retrieval.
 - **Back-End:** Spring-based system to consume RESTful API utilizing HTTPS protocols for credential validation and database modifications, implementing GET, POST, and DELETE methods with data returned in JSON format.
 - **Back-End:** Spring-based system to consume SOAP web services from various servers, transforming data from XML to JSON format for optimal control and integration with the user interface.
- **Emploey Password Management and Creation.**
 - **Front-End:** Development of an Angular interface for password generation system, with status control and validation for better experience user. The system allows creating passwords with specific characteristics, such as length, inclusion of special characters, and uppercase letters.
 - **Back-End:** Development of a service in Node.js for storing encrypted passwords in PostgreSQL, utilizing SALT and HASH methods for password encryption.

Jr Full-Stack Developer: Transportes ALGEZA (2021 - 2022)

- **Quality Management in Client-Side Project.**
 - **Front-End:** Testing API usage and implementing web status control, including error handling. This ensured the platform's reliability and efficiency across various use cases.
 - **Back-End:** Monitoring and testing of REST APIs using the Django framework, ensuring proper integration with the Microsoft SQL Server database.

Development Intern: HP Hewlett-Packard (2021)

- **Development of a tracking system.**
 - **Front-End:** Angular interface to input tracking codes and courier company data using a RESTful API, enabling automated retrieval of tracking information and its seamless display on the interface.
 - **Back-End:** Service in Django capable of performing web scraping across various tracking websites.
